## **Transmitter**

# For gas density, temperature, pressure and humidity of $SF_{\epsilon}$ gas Model GDHT-20, with MODBUS® output

WIKA data sheet SP 60.14

for further approvals see page 3

## **Applications**

- Permanent monitoring of the relevant gas condition parameters in closed tanks
- For internal and external SF<sub>6</sub> gas-insulated equipment

## **Special features**

- High-accuracy sensor technology
- MODBUS® output protocol via RS-485 interface
- Ingress protection IP65
- Very good long-term stability and EMC characteristics
- Compact dimensions

#### Transmitter, model GDHT-20

## Description

The model GDHT-20 transmitter is a multi-sensor system with digital output for the measurands of pressure, temperature and humidity. Based on these measured values, the condition-related data can be determined.

#### **Permanent monitoring**

In order to prevent system failures in switchgear and, with that, network outages, the permanent monitoring of the gas density and moisture content is essential.

The GDHT-20 transmitter calculates the current gas density from the pressure and temperature using a complex virial equation in the transmitter's powerful microprocessor. Pressure changes resulting from thermal effects will be compensated by this and will not affect the output value.

In addition, the GDHT-20 transmitter delivers humidity or dew point information, which enables monitoring within the terms of the Cigré directives and IEC standards.

#### MODBUS® fieldbus

The RS-485 interface communicates using the MODBUS® RTU protocol. The instrument's output parameters and their units can be configured and read according to requirements. The GDHT-20 transmitter can be configured later by the customer for each defined SF<sub>6</sub> gas mixture with N<sub>2</sub> or CF<sub>4</sub>.

#### Signal stability

Due to its high long-term stability, the transmitter is maintenance-free and requires no recalibration.

Due to the hermetically sealed weld seam and a measuring cell design without sealing elements, the permanent sealing of the measuring cell is ensured.

The EMC characteristics fulfil the IEC 61000-4-2 through to IEC 61000-4-6 standards and guarantee an interference-free data output.

## **Specifications**

#### Measuring ranges

Dew point: -50 ... +30 °C

Density: 0 ... 60 g/litre (8.87 bar abs. at 20 °C)

Temperature: -40 ... +80 °C
Pressure: 0 ... 16 bar abs.
Burst pressure: 52 bar abs.
Overload safety: up to 30 bar abs.

Pressure reference: Absolute

#### **Accuracy**

Specifications only valid for clean gaseous SF6

Dew point: ±3 K

Density: ±0.60 %, ±0.35 g/litre (-40 ... 80 °C)

Temperature: ±1 K

Pressure: ±0.20 %, ±32 mbar (-40 ... < 0 °C)

±0.06 %, ±10 mbar (0 ... 80 °C)

#### Long-term stability at reference conditions

Temperature:  $\leq \pm 0.10 \%$  of span/year Pressure:  $\leq \pm 0.05 \%$  of span/year Dew point:  $\leq \pm 0.50 \%$  of span/year

#### Refresh rate

Density: 20 ms Temperature: 20 ms Pressure: 20 ms

Dew point: 2 s (typical), auto-adjustment cycle every

30 min.

#### Permissible ambient temperature

Selectable v	electable versions			
Standard	-40 +80 °C -40 +176 °F	-40 +80 °C -40 +176 °F		
Option	-60 +80 °C -76 +176 °F	-60 +80 °C -76 +176 °F		

#### Power supply U<sub>B</sub>

DC 17 ... 30 V

#### **Power consumption**

max. 0.5 W (max. 3 W during the heating phase of the humidity sensor)

#### **Electrical connection**

Circular connector M12 x 1 (5-pin) MODBUS® RTU via RS-485 interface

Circular connector M12 x 1 (5-pin)						
	1	С	RS-485 reference potential (common)			
(20 01)	2	U <sub>B</sub>	Power supply			
((30 5 OL)))	3	GND	Ground			
	4	Α	Signal RS-485			
	5	В	Signal RS-485			

Mixture ratio of  $SF_6$  to  $N_2$  or  $CF_4$  (default 100 %  $SF_6$  gas) Customer-specific sensor name

Measured values with alternative units can be retrieved directly in the MODBUS® registers.

Density: g/litre, kg/m³
 Temperature: °C, °F, K

■ Pressure: mbar, Pa, kPa, MPa, psi, N/cm², bar (at 20 °C)

#### **Process connections**

Selectable versions
G 1" B, male thread, stainless steel
DN 20, female thread
G ½ B, male thread
Malmkvist <sup>®</sup>
Via measuring chamber (see page 5)

#### Case

Stainless steel

#### Permissible air humidity

≤ 90 % r. h. (non-condensing)

#### Ingress protection

IP65, only when plugged in and using mating connectors with the corresponding ingress protection

#### **Electrical safety**

Protected against reverse polarity, protected against overvoltage

#### Dimensions

Diameter: 48 mm Height: 96 mm

#### Weight

approx. 0.40 kg

#### **EMC** tests

■ Immunity per IEC 61000-4-3:

30 V/m (80 MHz ... 2.7 GHz)

■ Burst per IEC 61000-4-4: 4 kV

■ Surge immunity per IEC 61000-4-5:

1 kV conductor to ground, 1 kV conductor to conductor

■ ESD per IEC 61000-4-2:

8 kV/15 kV, contact/air

■ High-frequency fields per IEC 61000-4-6:

3 V

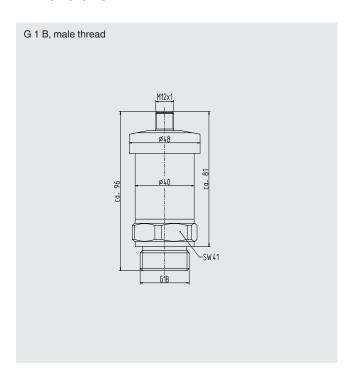

## Functionality MODBUS®

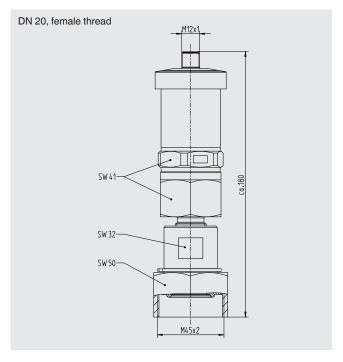

# **Approvals**

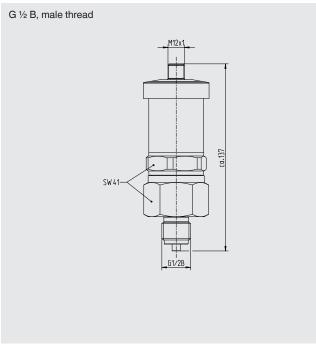

Logo	Description	Country
CE	EU declaration of conformity ■ EMC directive, EN 61326 emission (group 1, class B) and immunity (industrial application) ■ RoHS directive	European Union
EAE	EAC EMC directive	Eurasian Economic Community

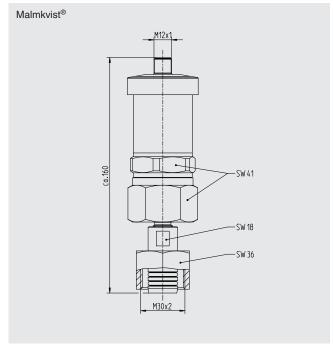

Approvals and certificates, see website

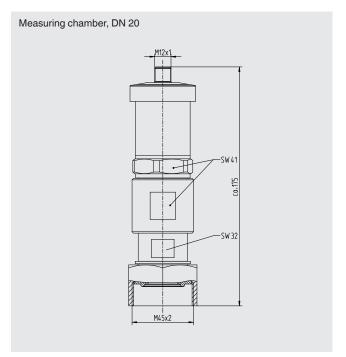

## **Dimensions in mm**

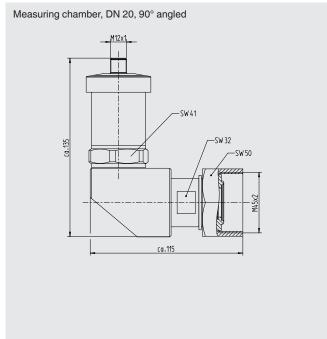

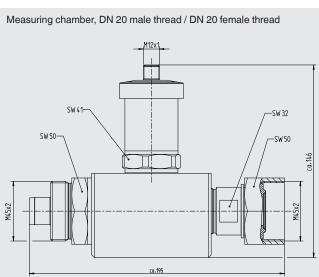

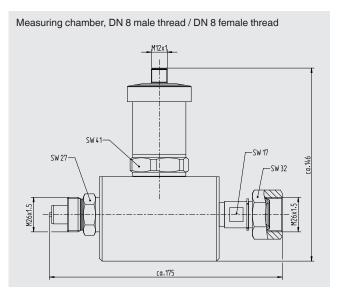

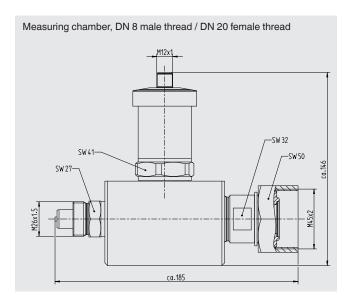

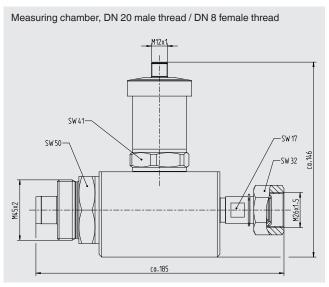

## **Accessories**

Designation	Order number
Modbus® startup kit for configuration, consisting of:	14075896
Power supply unit for transmitter	
■ Cable with M12 x 1 connector	
■ Interface converter (RS-485 to USB)	
■ USB cable type A to type B	
■ Modbus® tool software on USB stick
